Facial plastic surgeons and plastic surgeons increasingly receive requests for reconstructive and enhancement facial surgery to modify features characteristic of non-Caucasian patients. The goals of these surgeries are not to duplicate caucasian facial features but to modify, enhance, and correct the features within the racial features. Topics in this publication include: Cultural Preservation of the non-Caucasian Face; New Paradigm for Rejuvenating the Aging Non-Caucasian Face; Asian Blepharoplasty; Facial Implants in the Non-Caucasian Face; A New Skin Classification System; Laser Resurfacing for the Non-Caucasian Face; Chemical Peels for the Non-Caucasian Face; Lip Reduction Techniques in the Non-Caucasian Face; Hispanic/Mestizo Rhinoplasty; African Rhinoplasty; Middle Eastern Rhinoplasty; Hair Restoration in the Non-Caucasian Face; Lower Facial Rejuvenation in the Non-Caucasian Face; Upper & Midfacial Rejuvenation in the Non-Caucasian Face; Lower Facial Rejuvenation in the Non-Caucasian Face; Lower Facial Contouring with Botulinum Toxin & Micro-Botox; and Traumatic Rhinoplasty in the Non-Caucasian Nose.

Take your practice to the next level! Cosmetic Facial Surgery provides a highly illustrated, case-based approach to common face and neck procedures. In this full-color reference, internationally renowned surgeon Joe Niamtu III, DMD, covers techniques including brow, face, and neck lifts; nose, eye, and ear surgery; cosmetic surgery practice with discussions of the process of facial aging, diagnosing and consulting with patients, clinical digital facial implants; skin resurfacing; the use of neurotoxins; and the removal of skin lesions. The book also prepares you for photography, and anesthesia considerations. In a companion DVD, video clips feature Dr. Niamtu demonstrating key procedures addressed in the text.

This series of books is aimed at all health science students requiring an introductory, low cost and highly illustrated guide to the clinical specialties. The material is presented in double page spreads. The left-hand page has a synoptic and highly structured text (normally under the following headings: incidence; clinical features; differential diagnosis; management; prognosis). The right-hand page has a selection of four to six clinical photographs. Because of shorter hospital stays and more outpatient treatment the student is less likely to be able to see these conditions on the ward. The books are a convenient pocket size and are ideal for quick preparation before ward rounds. Each volume also includes self-assessment material ideal for preparation for examinations.

Hurwitz Clinical Pediatric Dermatology, by Amy S. Paller, MD and Anthony J. Mancini, MD, gives you easy access to the practical, definitive guidance you need to expertly identify and manage all types of skin disorders seen in children. Continuing the legacy of Dr. Sidney Hurwitz's beloved reference, it covers all pediatric dermatoses in a thorough, yet efficient and accessible way, enabling you to get the answers you need quickly and provide your patients with the most effective care. This edition brings you up to date on the latest classification schemes, the molecular basis for genetic skin disorders, atopic dermatitis, hemangiomas, viral disorders, bites and infestations, hypersensitivity disorders, collagen vascular disorders, bacterial and fungal infections, psoriasis, contact dermatitis, and much more. A thousand full-color photographs help you to recognize the characteristic manifestations of every type of skin disease. And, full-text access at [www.expertconsult.com](http://www.expertconsult.com) allows you to rapidly search the book online and download all of its illustrations. Hurwitz remains the indispensable pediatric dermatology resource you need for optimal practice.
