The revolutionary Gale Virtual Reference Library provides a combination of features and functionality that no other provider does, including:

- 24/7 remote access with no special reader or hardware required
- You own the content forever, just like a print version
- No check in or check out

ALWAYS OPEN, ALWAYS AVAILABLE

Gale Virtual Reference Library's unprecedented searchability empowers users to search a single eBook or your whole collection. Online searchability makes often-requested titles available to multiple users — and not just during business hours. Your library users can link to reference content through your OPAC or directly from the Table of Contents or Index page of a specific title. You're offering unlimited circulation of your reference collection with no checkout requirements and no turnaways. And cross-title searches mean faster, more comprehensive results.

PATRONS AND STUDENTS WILL LOVE THESE FEATURES:

- The ability to navigate a list of subjects and titles from the home page
- Viewing titles without performing a search
- Citation export (EndNote, ProCite, Reference Manager)
- Citation generator (APA, MLA, tagged format)
- Download, e-mail or print entries
- Bookmark generator - return to virtually any spot in the research via a persistent URL
- On-demand content translation — into Spanish, French, German, Japanese, Chinese, Korean, Italian and Portuguese
- On-demand interface translation into English, Spanish, French and Portuguese

SEARCHING MADE SIMPLE

Gale Virtual Reference Library's basic search functionality is simple to use — researchers find terms through a keyword search, by document title or by searching an entire document. For research that requires a more advanced approach, Gale Virtual Reference Library supports searches that combine criteria by:

- Title
- Keyword
- Image captions
- Publisher
- Author
- Full text
- Publication date
- ISBN
- Starting page

Need to further refine your search? You can limit results of your search by source or by publication date; select from a subject list of all disciplines in your collection; or focus on reference directed at children's or general audience reading levels. With cross-title searching, you may browse a list of all titles sources in your collection and select up to 10 to add to your search query. Results are delivered at the article level (not a page at a time) in an HTML-based text and graphics format that's designed for speedy display and easy readability. With single-click ease, articles can be printed, e-mailed or displayed as PDF page layouts.
